

TEAM 2

What has been done:

- Database schema design is ready
- Database implemented to backend and CRUD operations tested
- Project connected to database (MariaDB)
- Github updated
- Trello updated
- Developed UI components and frontend
- Maven configured
- Unit testing
- Jacoco integrated and code coverage report created

Highlights:

- UI utilizes components
- Unit tests

1. Obstacles Encountered:

- We had some problems with tests, which took time to resolve.
- Getting components to work with JavaFX was a bit tricky

2. Postponed for Sprint 3:

- Frontend tests
